Summary

Software Developer with a B.S. in Computer Science and 2.5 years of hands-on experience designing, developing, and shipping scalable backend systems, automation pipelines, and AI-integrated web applications. Proficient in Python, Go, and SQL, with practical experience integrating LLM APIs (Claude, OpenAI) into production workflows and guiding teams on AI-assisted development best practices. Bilingual (English/Spanish).

Skills

Languages	Python, Go, C++, Java
Technologies	SQL, PostgreSQL, Git, Docker, Selenium, Stripe, Streamlit, REST APIs, SFTP, CI/CD workflows
AI & LLM	OpenAI API, Claude API, Prompt Engineering, LLM Integration, RAG concepts, GitHub Copilot, Claude Code, OpenAI Codex
Concepts	Scalable System Design, Backend Development, Data Pipelines, Process Automation, Unit & Integration Testing

Experience

Software Developer Jan 2024 – Present

Microimaging Source Inc.

- Architected an extensible, inheritance-based document ingestion framework across multiple government counties supporting local-filesystem, SFTP, and Selenium delivery modes; fault-tolerant batch processing; duplicate-tracking state; and multi-format image normalization (JPEG, PNG, TIFF, PDF); cut manual processing time by **90%**, processing **hundreds of records per run** with no data loss over two years in production
- Designed and shipped Python and SQL analytics pipelines for business clients, **reducing reporting time by 40%**; optimized SQL queries on large datasets achieving sub-second response times
- Built high-performance backend services in Go; integrated OpenAI and Claude APIs into development workflows to accelerate debugging, testing, and feature delivery
- Established coding standards and a reusable template architecture; engineered an AI agent to assist with county program development, reducing build time from weeks to **as little as five hours**
- Established unit and integration test suites, raising code coverage and preventing regressions in production

Academic Tutor Aug 2019 – Aug 2023

Indian River State College

- Provided academic support in mathematics and computer science while completing an A.S. and B.S. in Computer Science simultaneously; maintained high student satisfaction through clear communication and adaptive instruction

Projects

vibecheck — *Python, Claude API, CLI* github.com/swdmartinez/vibecheck

- CLI tool that reviews git diffs against a best-practices checklist; combines offline PHI and secrets pattern scanning with Claude-backed code review; includes CI integration and a healthcare-specific checklist

ticketsmith — *Python, Streamlit, Claude API* github.com/swdmartinez/ticketsmith

- Converts rough feature or bug descriptions into structured engineering tickets with user story, acceptance criteria, edge cases, and suggested tests using the Claude API; ready to paste into Jira or GitHub Issues

SCORM Package Validator — *Python, Streamlit* github.com/swdmartinez/SCORM-Validator

- Web-based SCORM 1.2/2004 validator that parses `imsmanifest.xml`, checks spec compliance, validates file references, and surfaces a structured error and warning report

ZaiOT — *Python, Streamlit, Stripe, Cloudflare* zaiotcalculator.streamlit.app

- **Monetized** SaaS web app with Stripe payments, gated access control, automated report generation, and bilingual (English/Spanish) support serving real paying users with no unplanned downtime

Education

B.S. Computer Science, *Cum Laude* May 2022 – Dec 2024

University of Florida Online

A.S. Computer Science Jun 2019 – Jun 2022

Indian River State College

Languages: English (Native) | Spanish (Native)
